1985 graduated from nagoya university of arts  
1985~2020 lives and works in tokyo  
2021~ lives and works in kyoto

the existence of the non-existent

works start to exist as an object that emerges from the world, and as an element constituting the world.

structured, the world comes into the actual existence for the very first time. the existence of the non-existent is a true existence and eventually it will be stabilized in the world.

things that have appeared would function as imagery which can be shared with others.

takahiro tanaka, production note 2017

solo exhibition
